PROFILE SUMMARY

I am an entry-level MERN Stack Developer with knowledge of MongoDB, Express.js, React, and Node.js. I enjoy building full-stack web applications and learning new technologies. I have completed several projects to improve my development skills and understanding of modern web development.

TECHNICAL SKILLS

Frontend

- HTML5 CSS3 JavaScript Bootstrap

TOOLS USED

Bolt Lovable Emergent GenSpark

PROJECTS

AI Resume Tailor :

Tech Stack: React + Vite, Express.js, Supabase

- Developed a web application that helps users tailor their resume for specific job descriptions using AI.
- Built the frontend using React and Vite for a fast and responsive user interface.
- Created backend APIs using Express.js to handle resume processing.
- Used Supabase as a cloud database to store user data and generated resumes.
- Integrated AI features to analyze job descriptions and suggest resume improvements.

Weather Detection App

Tech Stack: JavaScript, HTML, CSS, Weather API

- Built a weather application that shows current weather information for any city.
- Integrated a weather API to fetch real-time weather data.
- Displayed temperature, humidity, and weather conditions dynamically.
- Designed a simple and responsive user interface using HTML, CSS, and JavaScript.

QR Code Generator

Tech Stack: React + Vite

- Developed a web application that generates QR codes from user input.
- Built the interface using React with Vite for faster development.
- Implemented QR code generation based on text or links entered by the user.
- Designed a clean and simple user interface for easy use.

Netflix Clone

Tech Stack: HTML, CSS, JavaScript

- Created a Netflix landing page clone to practice frontend development skills.
- Designed the layout using HTML and CSS to replicate the Netflix homepage.
- Added interactive elements using JavaScript.
- Focused on responsive design and UI styling.

EXPERIENCE

Full Stack Developer Intern

Jestech | 1 Month

- Completed a 1-month internship program focused on Front end development.
- Learned and practiced building full-stack web applications using HTML , CSS , Javascript
- Developed small web application features and practiced CRUD operations.
- Used Git and GitHub for version control and project management.
- Successfully completed the internship and received a Frontend Developer Internship Certificate.

EDUCATION

B.E -Electronics and Communication Engineering | IV Year (Pursuing)

2023-2027
